DIMENSIONAL VIEWS

7-seater

* With roof rails

All measurements in millimeters

Note: Glass antenna is optional.
Find The Far Beyond.
The world is yours in the new MONTERO SPORT. Whether confidently exploring rough terrain in the wilderness or attracting admiration on city streets, you’ll be traveling first class all the way.
Discover the new look of 4WD luxury. Boldly sculpted and stylishly accented, the assertive aerodynamic body delivers solid refinement down to the last detail — from Dynamic Shield front design concept to vibrant rear lamps. So you can seize every adventurous opportunity with style.

**Tastefully Robust**
Premium Comfort

Adventure calls from the well-appointed cockpit, which surrounds you with solid craftsmanship, supportive comfort, intelligent features and a wide open view. From refined meters to sophisticated floor console, every feature is fine-tuned to enhance driving pleasure and keep you in confident control.
Pleasant Journeys

Every guest feels special in the luxurious interior. From leather seats with smooth gathers and dual layered cushioning to relaxing spaciousness and an optimized driving position, it keeps everybody comfortable and in the best of spirits.
Hill Descent Control (HDC)

Pressing the HDC mode selector activates HDC, which automatically applies the brakes to maintain your current speed when traveling downhill at 2 ~ 20km/h. This lets you concentrate on steering and travel downhill with greater safety without having to manually apply the brakes.

Note: Hill Descent Control (HDC) is not a substitute for safe driving. Never rely solely on this function while driving on steep roads. When driving on slippery roads such as muddy, icy or unpaved road, your vehicle will not allow you to stay at a constant low speed, which may lead to an accident. Please see the owner’s manual for additional information.

Solid Handling

Handling is stable and accurate on and off road, in all kinds of weather and driving conditions, thanks to selectable 2WD and 4WD modes, an OFF ROAD MODE that enhances traction on demanding surfaces, intelligent assistance in challenging conditions, an advanced suspension and outstanding all-around clearance.

Note: Equipment may vary by market. Please consult your local Mitsubishi Motors dealer/distributor for details.

Hill Start Assist (HSA)

When starting on a steep slope, HSA helps prevent you from rolling backwards while you release the brake by maintaining the braking force for up to two seconds until the accelerator is applied.

With Hill Start Assist
Note: Hill Start Assist (HSA) is not a substitute for safe driving. Never rely solely on this function while driving on steep roads. Your vehicle may move backwards if the brake pedal is heavily loaded, or if the road is very steep or slippery. The function is not available on non-paved roads.

Without Hill Start Assist

Note: Hill Start Assist (HSA) is not a substitute for safe driving. Never rely solely on this function while driving on steep roads. Do not rely on the function to maintain a stopped position as an alternative to depressing the brake pedal. Please see the owner’s manual for additional information.

All-terrain confidence

Because challenges come in all shapes and sizes, this model is designed to climb up, over, around and through the toughest terrain.

Class-leading 5.6m turning radius

The turning radius is surprisingly small for a vehicle of this size, making it especially easy to park and maneuver.

Note: OFF ROAD MODE is only available in the 4HLc and 4LLc settings.

* The ROCK setting is available in the 4LLc setting only.

Hill Descent Control (HDC) is not a substitute for safe driving. Never rely solely on this function while driving on steep roads. When driving on slippery roads such as muddy, icy or unpaved road, your vehicle will not allow you to stay at a certain low speed, which may lead to an accident. Please see the owner’s manual for additional information.

Note: The control capabilities of ASTC are supplemental only. Please drive safely and never rely solely on these functions while driving. Be sure to use the same weight of tires and size of tires on all 4 wheels. Do not install any aftermarket limited slip differential on your vehicle. Please see the owner’s manual for additional information.

Challenge comes in all shapes and sizes, this model is designed to climb up, over, around and through the toughest terrain.

Dynamic Power

Whether passing vehicles on highways or traveling up steep slopes, you need powerful response you can depend on. The 3.0-liter V6 MIVEC* gasoline engine generates all the power you demand of a rugged SUV to accomplish every mission with smooth, efficient ease.

* MIVEC (Mitsubishi Innovative Valve timing Electronic Control system)

3.0-liter V6 MIVEC

Tough and powerful, the high-displacement V6 engine supplies strong acceleration even when carrying heavy loads or traveling up mountain roads.

8-speed automatic transmission

The 8-speed automatic transmission, the first from Mitsubishi Motors, delivers a smoother, more luxurious ride and improved fuel efficiency.

Paddle shifters

Sporty paddle shifters let you shift gears with a press, without removing your hand from the steering wheel.
Technology For Peace Of Mind

Sophisticated new safety features intelligently support safer driving whether you are parking or cruising on the highway. You can drive with greater confidence knowing that all occupants are solidly protected by a robust RISE body and comprehensive safety measures.

Blind Spot Warning system (BSW)
This safety feature uses radar sensors in the rear bumper to detect vehicles in your rear blind spots, on the right and left sides. An indicator appears in the corresponding door mirror and a buzzer sounds when the turn signal is on, an indicator blinks in the corresponding door mirror and a buzzer sounds.

Ultrasonic misacceleration Mitigation System (UMS)
To help prevent collisions while parking, a buzzer sounds and a warning displays if front or rear sensors detect a nearby obstacle. Engine output is also controlled if you suddenly accelerate by accident.

Forward Collision Mitigation system (FCM)
Helps prevent a frontal collision or reduce damage if the collision becomes unavoidable. Responds to vehicles via radar.

Multi-around Monitor
The views from cameras mounted on the front, rear and sides of the vehicle (including a bird’s-eye view) can be displayed in various combinations to reveal what is in blind spots and help you park more safely.

RISE body
Collision safety performance is significantly enhanced by Mitsubishi Motors’ RISE (Reinforced Impact Safety Evolution) body, which efficiently absorbs energy and maintains high cabin integrity in the event of a collision.

Rigid lightweight body
The body is extremely sturdy and lightweight, due to the generous use of high tensile strength steel plates that also contribute to a high level of collision safety.

Tire Pressure Monitoring System (TPMS)
TPMS employs sensor-transmitters in the wheels to monitor tire pressure and illuminates a warning lamp on the combination meter cluster if one or more tires becomes significantly underinflated.

Adaptive Cruise Control (ACC)
Maintains a selected distance between your vehicle and the car ahead via radar to lend driving assistance and enhance driving comfort. It especially reduces driver stress during slow traffic jams on highways.

Pretensioners
Pretensioners on the front seatbelts automatically tighten the belts in the event of a collision to help restrain the driver and front passenger.

Note: The detection and control capabilities of the Blind Spot Warning system (BSW) are supplemental only and do not warn you of vehicles in blind spots in every situation. Please do not rely solely on this system while driving. The Blind spot monitor may not operate normally in some cases, depending on traffic, weather, road surface conditions and the presence of distractions. Drivers are fully responsible for their own safe driving. The radar sensor graphics are for illustrative purposes only and do not represent the actual sensor application.

Note: The detection and control capabilities of the Ultrasonic misacceleration Mitigation System (UMS) are supplemental only and do not prevent misacceleration in every situation. Please drive safely and do not rely solely on this system while driving. To prevent the engine output control provided by UMS from causing an impairment during normal driving in rough-road driving conditions, the system automatically de-activates and indicates UMS OFF in the meter cluster when the vehicle is driven on rough roads in a UMS OFF status.

Note: The detection and control capabilities of the Forward Collision Mitigation system (FCM) are supplemental only and do not prevent collisions in every situation. Please drive safely and do not rely solely on this system while driving. FCM may not activate in some situations. Please read the owner’s manual carefully and be aware of these limitations. Auto braking does not operate against stationary vehicles when the speed of your car is above approx. 30km/h. Since FCM has no function to maintain braking, the brake is released approximately 2 seconds after stopping. To prevent the vehicle from moving thereafter, the driver may have to hold the brake pedal down. Please see the owner’s manual for additional information.

Note: Equipment may vary by market. Please consult your local Mitsubishi Motors dealer/distributor for details.

Note: single pretensioners are optional. Dual pretensioners are standard.
Feature Highlights

LED headlamps and daytime running lamps
Sophisticated LED headlamps and daytime running lamps contribute to an appealing, high-quality personality.

High-contrast meters and multi-information display

Steering switches

Electric parking brake
The parking brake is easy to operate via a stylish switch. Simply pull the switch up to apply the parking brake or push the switch down to release it.

USB port (for charging) & Seatback pocket

220V AC power outlet
Simply plug in to power small electric devices up to 150W.
Note: The maximum voltage and plug type may vary depending on market needs.

Keyless operation key

Engine switch

LED rear combination lamps
Dynamic LED rear combination lamps boldly proclaim this is no ordinary SUV.

265/60R18 tire with 18-inch alloy wheel (two tone)

265/60R18 tire with 18-inch alloy wheel

Note: Equipment may vary by market. Please consult your local Mitsubishi Motors dealer/distributor for details.
Feature Highlights

Dual-zone automatic climate control air conditioner
The powerful air conditioning system provides separate temperature settings for the driver and front passenger.

Powerful front and rear air flow
The air conditioning system now provides significantly more powerful cooling with top-class air flow that keeps all passengers comfortable even in the hottest weather.

Cargo space
- Third-row seatbacks folded down
- Second and third-row seatbacks folded down

Mitsubishi Multi Communication System (MMCS)
The multifunctional navigation system clearly displays navigation and music functions on a big touch panel display with easy-to-use interface. Images from the rear-view camera can also be displayed to enhance driving safety.

Wide 2DIN AM/FM CD display audio
Controlling the audio system is easy on the 6.1-inch QVGA touch panel display which can also display the views from the rear view camera.

CD/MP3 player
A quality tuner/CD player and USB port on the floor console enable easy connection with an iPod or other audio player for charging or listening pleasure.
